

# Sterilizair AFD / HEPA

- 600+ CFM
- Extremely low 1.4 amps
- Filters smoke residue, pollutants, dust & allergens
- Includes a pre-filter and a HEPA filter with optional charcoal filter
- Variable Speed & Hour Meter
- Change Filter Indicator
- Multi-port exhaust vents
- **Patent Pending**

**"Our unit was designed to filter contaminants in individual areas while in air change mode instead of negative pressure, and works more efficiently than placing 1 large unit for multiple areas. Because our unit exhausts all four directions, it helps to keep substances aerosolized for better filtration rather than one outlet exhausting into the airspace."**

**-David Hodge,  
Co-Patent Applicant**
