

SAFETY DATA SHEETS

1. Identification – Product and company identification

CHEMTREC EMERGENCY TEL: 1-800-424-9300

O.C.C.S. 10680 FERN AVE STANTON, CA 90680

PRODUCT ITEM#: 52412,52413,52414,52415-BLEACH

DATE PREPARED: 3/10/15

RECOMMENDED USE: Cleaning & Deodorizing

RESTRICTIONS ON USE: For Industrial and Professional Use

PRODUCT DILUTION INFORMATION: Ready to use

2. Hazardous Identification

Physical hazards Corrosive to metals Category 1

Health hazards Skin corrosion/irritation Category 1, Serious eye damage/eye irritation Category 1

Specific target organ toxicity, single exposure Category 3 respiratory tract irritation

Hazardous to the aquatic environment, acute hazard Category 1

Environmental hazards Hazardous to the aquatic environment, Category 2 long-term hazard

OSHA defined hazards Not classified.

Signal Word: Danger

Hazard Statements: May be corrosive to metals. Causes severe skin burns and eye damage. May cause respiratory irritation. Very toxic to aquatic life. Toxic to aquatic life with long lasting effects.

PRECAUTIONARY STATEMENTS: Prevention Wear protective gloves/protective clothing/eye protection/face protection. Do not breathe mist or vapor. Use only outdoors or in a well-ventilated area. Wash thoroughly after handling. Keep only in original container. Avoid release to the environment. **Response** If swallowed: Rinse mouth. Do NOT induce vomiting. If inhaled: Remove person to fresh air and keep comfortable for breathing. If on skin (or hair): Take off immediately all contaminated clothing.

Rinse skin with water/shower. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. Wash contaminated clothing before reuse. Absorb spillage to prevent material damage. Collect spillage.

Storage Store in a well-ventilated place. Keep container tightly closed. Store locked up. Store in corrosive resistant container with a resistant inner liner.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

OTHER HAZARDS: None known

3. Composition/information on ingredients

SUBSTANCE/MIXTURE: CHEMICAL NAME: Mixture

Sodium hypochlorite 7681-52-9

4. First aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Take off immediately all contaminated clothing. Wash off IMMEDIATELY with plenty of water for at least 15-20 minutes. Get medical attention immediately. Wash contaminated clothing before reuse. Call a physician or poison control center immediately.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

Most important symptoms/effects, acute and delayed

Corrosive effects. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

Indication of immediate medical attention and special treatment needed

Treat symptomatically. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. With eye exposure, continue flushing during transport to hospital.

SAFETY DATA SHEETS

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO₂).

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire. Do not use dry extinguishing media that contains ammonium compounds.

Specific hazards arising from the chemical

During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire-fighting equipment/instructions

In case of fire and/or explosion do not breathe fumes. Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Wear appropriate personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Absorb spillage to prevent material damage. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see Section 8 of the SDS.

Methods and materials for containment and cleaning up

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use. For waste disposal, see Section 13 of the SDS.

Environmental precautions Do not discharge into drains, water courses or onto the ground. Environmental manager must be

informed of all major releases.

7. Handling and storage

Precautions for safe handling Wear appropriate personal protective equipment. Do not get in eyes, on skin, on clothing. Use with

adequate ventilation. Observe good industrial hygiene practices. Do not apply heat or direct sunlight. Temperature and product concentration affect product quality and decomposition rates.

Conditions for safe storage, including any incompatibilities

Keep container tightly closed. Store in a cool and well-ventilated place. Store in a corrosive resistant container. Consult container manufacturer for additional guidance. Store away from and do not mix with incompatible materials such as acids, oxidizers, organics, reducing agents, and all metals except titanium.

8. Exposure controls/personal protection

Occupational exposure limits US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components Type Value Sodium hydroxide (CAS PEL 2 mg/m³ 1310-73-2)

US. ACGIH Threshold Limit Values Components Type Value Sodium hydroxide (CAS Ceiling 2 mg/m³ 1310-73-2)

US. NIOSH: Pocket Guide to Chemical Hazards Components Type Value Sodium hydroxide (CAS Ceiling 2 mg/m³ 1310-73-2)

US. Workplace Environmental Exposure Level (WEEL) Guides Components Type Value Sodium hypochlorite (CAS STEL 2 mg/m³ 7681-52-9)

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eye wash facilities and emergency shower must be available when handling this product.

Individual protection measures, such as personal protective equipment Eye/face protection Wear safety glasses with side shields (or goggles) and a face shield. Wear a full-face respirator, if needed.

Skin protection Hand protection Wear appropriate chemical resistant gloves. **Other** Wear appropriate chemical resistant clothing. Reports indicate that sodium hypochlorite can react with various fabrics usually increasing with concentration. Reactions vary significantly depending on strength of chemical, material, fabric treatment and color of dyes. FRC treated

SAFETY DATA SHEETS

cotton has a stronger response than plain cotton. Poly blend fabrics and meta aramid fabric have a weaker response than natural fibers. Contact the Personal Protective Equipment manufacturer for specific information about their products.

Respiratory protection If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Thermal hazards Wear appropriate thermal protective clothing, when necessary. **General hygiene considerations** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants

9. Physical and chemical properties

Appearance Physical state Liquid. **Form** Liquid. **Color** Not available. **Odor** Pungent. **Odor threshold** 0.9 mg/m³
pH 12 - 14 (25 °C/77 °F) **Melting point/freezing point** -4 °F (-20 °C) (7% solution) **Initial boiling point and boiling range** Not available.

Flash point Not applicable **Evaporation rate** No data available **Flammability (solid, gas)** Not available. **Upper/lower flammability or explosive limits** **Flammability limit – lower (%)** Not applicable **Flammability limit – upper (%)** Not applicable

Explosive limit - lower (%) Not available. **Explosive limit - upper (%)** Not available. **Vapor pressure** 12 mm Hg (20°C/68°F)

Vapor density Not available. **Relative density** Not available. **Solubility(ies)** **Solubility (water)** Completely miscible

Partition coefficient (n-octanol/water) Not available. **Auto-ignition temperature** Not applicable

Decomposition temperature Not available. **Viscosity** Not available. **Other information** **Bulk density** Not applicable

Molecular formula NaOCl **Molecular weight** 74.5 g/mol

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous reactions Hazardous polymerization does not occur.

Conditions to avoid Contact with incompatible materials. Avoid ultraviolet (UV) light sources. Excessive heat. Reacts violently with strong acids. Acid contact will produce chlorine gas. Amine contact will produce chloramines.

Incompatible materials Strong oxidizing agents. Acids. Metals. Organic compounds. Ammonia.

Hazardous decomposition products No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure **Ingestion** Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus and possibly the digestive tract.

Inhalation Vapors and spray mist may irritate throat and respiratory system and cause coughing. **Skin contact** Causes skin burns. **Eye contact** Causes eye burns. **Symptoms related to the physical, chemical and toxicological characteristics**

Corrosive effects. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. **Information on toxicological effects** **Acute toxicity** Occupational exposure to the substance or mixture may cause adverse effects.

Product Species Test Results Sodium Hypochlorite, 5 - 17% (CAS Mixture) LD50 Rabbit *Dermal* **Acute** > 2 g/kg LD50 Rat *Oral* 3 - 5 /kg * Estimates for product may be based on additional component data not shown.

Skin corrosion/irritation Causes severe skin burns and eye damage. **Serious eye damage/eye irritation** Causes serious eye damage.

Respiratory or skin sensitization **Respiratory sensitization** No data available. **Skin sensitization** No data available.

Germ cell mutagenicity No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Carcinogenicity This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA.

IARC Monographs. Overall Evaluation of Carcinogenicity Sodium hypochlorite (CAS 7681-52-9) 3 Not classifiable as to carcinogenicity to humans. **Reproductive toxicity** No data available. **Specific target organ toxicity - single exposure**

May cause respiratory irritation. **Specific target organ toxicity - repeated exposure** No data available. **Aspiration hazard** Not classified, however droplets of the product may be aspirated into the lungs through ingestion or vomiting and may cause a serious chemical pneumonia.

Chronic effects Prolonged or repeated overexposure causes lung damage. **Further information** Prolonged inhalation may be harmful.

12. Ecological information

Ecotoxicity Very toxic to aquatic life. Toxic to aquatic life with long lasting effects. **Product Species Test Results** Sodium Hypochlorite, 5 - 17% (CAS Mixture) **Aquatic** Crustacea LC50 Daphnia 1 mg/l * Estimates for product may be based on additional component data not shown. Fish LC50 Bluegill (*Lepomis macrochirus*) 0.6 mg/l, 48 hours **Persistence and**

SAFETY DATA SHEETS

degradability No data is available on the degradability of this product. **Bioaccumulative potential** No data available for this product. **Mobility in soil** Not available. **Other adverse effects** No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. This material and its container must be disposed of as hazardous waste. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazardous waste code The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some

product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information
